Collections

1. The streaming video service would be targeted to support library content and collections.
    a. These could potentially include
        i. Content licensed for the entire system for use through campus libraries
        ii. Content licensed for a specific campus for use through the library
        iii. Content created by individual campuses and curated by the library
            - video of campus events
            - video created by students for thesis or senior projects.
        iv. Content owned by individual campus libraries
            - Special collections material

Implementation

2. The CO SDLS has chosen and tested software: Kaltura <http://corp.kaltura.com/>
    a. Kaltura supports
        i. Bulk upload and FTP upload
        ii. An accessible (508 compliant player)
            - High contrast colors, hidden text elements, audio description layer, closed caption support and subtitles.
        iii. Mobile video delivery and mobile aware video delivery
        iv. HTML 5 Video
        v. Online video editing (including subtitling)
3. It would be up to individual libraries to determine whether they have the right to digitize/ stream content.
4. It would be up to individual libraries to digitize eligible collections.

Support Needed

- Consulting and support from the CO SDLS will be needed to
    a. Ensure acceptable video standards for digitization and conversion of content are being used
    b. Migrate content to the SDLS streaming servers
    c. Integrate streaming video into institutional repositories and Course Management
    d. Determine the best method to caption and provide transcripts for content
    e. Assist in limiting access to videos where necessary

Other Survey Comments/Findings

- Where possible, content should be made available to the entire system.
- 7 of 12 campuses clearly indicated they would use a streaming video service provided by the SDLS
- 6 of 12 campuses clearly indicated they had someone who could establish whether the campus has the right to stream content
