

Modifying the labels that appear in the Details section in Primo's full record view

Sandbox example:

[https://humboldt-primosb.hosted.exlibrisgroup.com/primo-explore/fulldisplay?docid=01CAL\\$ALMA71379441670002901&context=L&vid=01CAL\\$HUL&search_scope=EVERYTHING&tab=everything&lang=en_US](https://humboldt-primosb.hosted.exlibrisgroup.com/primo-explore/fulldisplay?docid=01CAL$ALMA71379441670002901&context=L&vid=01CAL$HUL&search_scope=EVERYTHING&tab=everything&lang=en_US)

Scenario

The Marc 300 field currently displays in Primo as "Format" but I want to change to label to "Extent".

Documentation (for Marcus' reference)

Primo configuration levels

https://knowledge.exlibrisgroup.com/Primo/Product_Documentation/060Back_Office_Guide/010Getting_Started/020Primo_Concepts%2C_Components%2C_and_Relationships#ww1070784

Installation: "Configuration data that belongs to the whole installation (such as a consortium) and can be shared by all institutions in the installation, but must be configured by installation-level staff users"

Institution: "Configuration data that belongs to a specific institution"

Code table inheritance levels

https://knowledge.exlibrisgroup.com/Primo/Product_Documentation/060Back_Office_Guide/140Code_Tables/030Code_Table_Inheritance_Levels

"you can configure many of the code tables for a specific institution. However, it is possible to share codes from the installation level via inheritance. This means that if an institution has not configured specific codes, the system will use the codes defined at the installation level or OTB level"

"Row – Indicates that only rows added or modified by the institution are specific to that institution, and all other rows are inherited from a higher level (such as the installation or OTB levels). All code tables in the Front End, Delivery, and OPAC via Primo subsystems are of this type."
